

Confined Space Emergency Training

The Michigan Institute for Public Safety Education (MIPSE) at Wayne County Community College District is able to train public and industrial emergency responders with the most up-to-date techniques for confined space entry, assessment and rescue.

Participants can learn how to operate safely and conduct rescue operations within a confined space with MIPSE's real life simulator, which is comprised of underground, interconnected vaults and tunnels, some of which are as small as 24 inches.

MIPSE can provide training to private industry and public responders in various confined-space subjects, including:

Fire Service

- Operating within a confined space
- Rescue operations within a confined space

Industry

- Training opportunities as a specialty team

What MIPSE Can Do For You

Wayne County Community College District and MIPSE can give practical hands-on instruction in the latest emergency response techniques, taught in a realistic yet safe setting. Employers, governmental departments and private industry can all benefit from such training, which can help protect employees and property.

Your group can choose from a variety of customized emergency training sessions, and MIPSE can tailor training to fit any budget.

We are ready to help you meet your goals!
